

Do you know
of a finisher that
weighs less?

EASIGLIDER. The lightest
surface finisher avail-
able – only 6.8 kg,
complete with 500 mm
diameter disc!

RATEC

As clever as concrete!

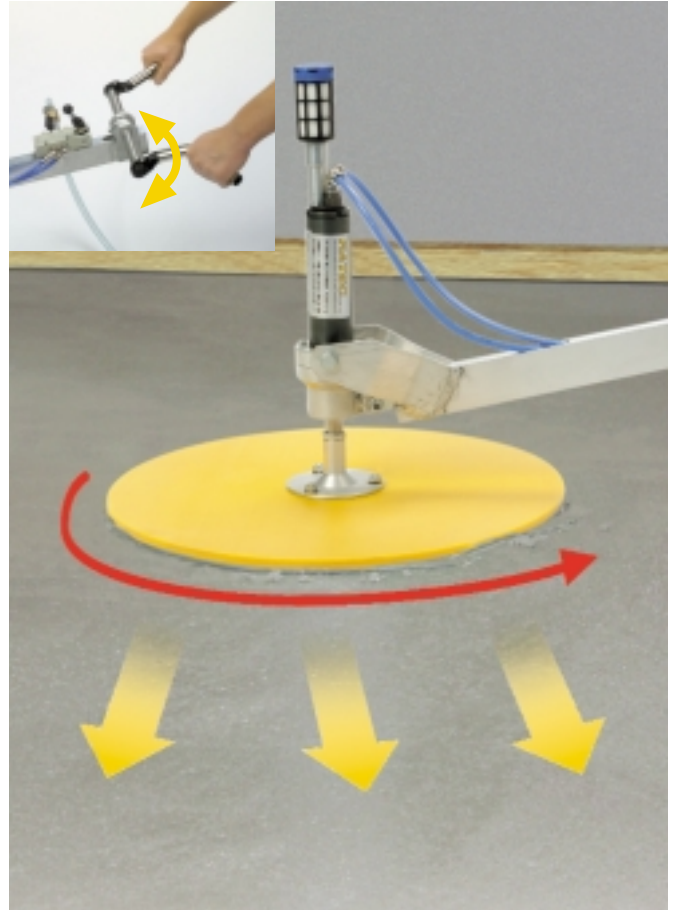

EASIGLIDER is a lightweight surface finisher for perfect surface finishing of concrete elements.

The well-proven surface finisher from RATEC produces mirror-smooth surfaces on concrete elements as if by magic. It is easily guided over the concrete surface and can even finish the corners with the aid of a guide. The extremely light weight prevents the redistribution of concrete and does not influence the strength of the precast element. You too can increase the quality of your products with our surface finisher:

Technical data:

Drive	Air Motor 0,375 kW
Capacity	Up to 400 r.p.m.
Control	Stepless speed adjustment
Standard disc	Diameter 500 mm (Other sizes available)
Handle	L 2000 mm (Standard) (Other lengths available)
Weight	Without disc < 5 kg
Art.no.	01626

Satisfied customers say, "We can finish twice as fast with the EASIGLIDER than before. A crane is no longer needed. Thus we save on labour cost and improve the quality at the same time!"
