# RATEC Electrical Box Magnets

➤ Pioneering thanks to practice-oriented technology

RATEC's electrical box magnets have been used for many years in the precast concrete industry. Our patented products offer longterm reliability and cost effective solutions for the precast industry. With our unique process integrating magnets and rubber forms, almost any shape can be achieved. Easy insertion and removal of the electrical boxes assures efficient and streamlined work processes. Once the powerful magnet is in place, it stays put. No slipping, no sliding. The magnets for empty conduit leave a recess in the concrete after removal.
